

MK-55-MM Mükava® for Monitor Arm

Mükava® ergonomic reading products hold laptops, tablets, phones, books, magazines and documents. Additionally, the reading surface can be used as a white board to facilitate communicate ideas between team members. These hands-free products help alleviate pain and facilitate healthy posture, while providing support for print or electronic media.

UNIVERSAL USE WITH ANY MONITOR ARM

Mükava® attaches to any industry-standard monitor arms via a 75 /100 VESA plate mount.

WHITE BOARD

Mükava® reading surfaces are made with Polyvision® e3 ceramic steel for use as a white board and best in class magnetic adhesion.

UNIVERSAL DESIGN

Mükava® will hold virtually any form of print or digital media, including laptops, tablets, phones and reading materials. Books are secured with bands that tuck under the Mükava® surface while documents are held with document pebbles. Mobile devices adhere with a Mükava® pad or Mükava® Case.

MÜKAVA® LED ACCESSORY LIGHT

Mükava® accessory LED lights provide two settings to allow you read traditional media without the need for ambient light.

Mükava® includes an integrated charging cable that will charge Apple® devices that use a Thunder Cable® and Android® devices. Additionally, there is an extra USB that that can be used to charge a second device; together they provide 5V and 2A of power when plugged into a power supply.

Mükava® includes a Kensington® security socket that works with Mükava® Security Solutions™ for tablets and third party products.
